Specialty products and equipment for the wheel alignment industry.

Alignment, steering & suspension is one of Australia's fastest growing sectors in automotive services. Today, in this new millennium, opportunities will be presented to those who stay up with the latest technology, training & equipment. Our aim is to provide you, our customer with the quality support, service and products to assure your place in that growing market, so you get a reward and keep your customers happy. Your bottom line should show a PROFIT from wheel alignment service. We are committed to finding accurate, easily installed solutions to auto steering and alignment problems. Our parts and equipment catalogue is a key step in helping you make more sales. Our proven experience, training facilities, technical support and R&D efforts are aimed at ensuring that you have satisfied customers who'll ensure your business prospers. We want to be the helping hand...a partner in your success.
